Church Furniture

of

Quality

Charles Svoboda

615 Schaff Building

Philadelphia, Pa.

TWENTY-EIGHT years ago I made my first sale of church furniture. That furniture is still in use, and except for the wear and tear of years is as good as the day it was put in.

Ever since that day I have tried to sell Furniture that would stand the test of time. In respect of Comfort, Design, Quality of workmanship as well as price, I have given my friends the best that money could buy. I have probably more friends among church folks than any man selling church furniture to-day.

There are pastors who have bought from me the second and even the third time, as they moved from one place to another.

I have hundreds of letters commending not only the work I have done but the methods I have used in dealing with church folks.

It has been and always will be my aim to have the best goods, and to have prices not dictated by any man or combination of men.

This book shows some of the more popular designs, but we have many others as well as designs of pulpit furniture which we will be glad to submit to any one interested.

Describe your requirements and we will do our best for you.
